Profile

Biology undergraduate at the Federal University of Santa Catarina (UFSC) and junior researcher investigating Brazil's cultivated-meat regulatory scene. I combine public-health research, regulatory analysis, data work, and student-led collaboration. I am especially interested in how evidence, institutions, environmental governance, and rights shape decisions about emerging technologies and public risks.

Experience & leadership

Junior researcher Brazil cultivated-meat regulatory scene	2026 - now
Data analysis assistant intern Descarbonize - analysis, research support, and data communication in a Brazilian-European startup	2026 - now
Member, Innovation & Technology Board AltProtein Project, UFSC - volunteer research and outreach connected to GFI Brasil	2026 - now
Student representative UFSC Biological Sciences Course Board	2026 - now

Education & selected learning
